PRE-HEARING STATEMENT

Pursuant to Your Honor's Standing Order for Claim Construction in Patent Cases, Joint Case Management Statement and Proposed Order (Dkt. 104) and Patent L.R. 4-3, Plaintiff Finjan LLC ("Finjan") and Defendant Palo Alto Networks, Inc. ("PAN") hereby submit this Joint Claim Construction and Pre-Hearing Statement.

I. PATENT L.R. 4-3(A): PROPOSED CONSTRUCTION OF EACH AGREED TERM

The parties' agreed constructions are provided below.

| Patent | Term | Agreed Construction |
|-----------|------------------------|---|
| 7,418,731 | "scanner" | "software, hardware, or a combination of both for |
| | | scanning" |
| 8,225,408 | "scanner" | "software, hardware, or a |
| | | combination of both for |
| | | scanning" |
| 8,225,408 | "parser rules" | "patterns of tokens that form |
| | | syntactical constructs of |
| | | program code" |
| 8,225,408 | "parse tree" | "a hierarchical structure of |
| | | interconnected nodes built from scanned content" |
| 0 141 154 | "transmitter" | |
| 8,141,154 | transmitter | "software, hardware, or a combination of both for |
| | | |
| 0.141.154 | ٠ | transmitting" |
| 8,141,154 | "receiver" | "software, hardware, or a |
| | | combination of both for |
| | | receiving" |
| 8,141,154 | "invoking a function"/ | "initiating a call to a function, |
| | "invoke" | regardless of whether the |
| | | function is executed/"invoke" |
| | | does not require execution of |
| | | a function" |

II. PATENT L.R. 4-3(B): PROPOSED CONSTRUCTION OF EACH DISPUTED TERM

The parties' proposed claim constructions are provided below for disputed terms. 1 The

¹ PAN notes that in addition to the disputed terms that are identified herein, the parties presently dispute the meaning of at least 10 other terms that may require resolution by the Court. *O2 Micro Int'l Ltd. v. Beyond Innovation Tech. Co.*, 521 F.3d 1351, 1360 (Fed. Cir. 2008). Pursuant to the

Case No. 14-cv-04908-JD

parties' proposed constructions and supporting evidence is provided in a side-by-side format as required by the Court's Standing Order for Patent Cases in Exhibit A. For simplicity, the supporting evidence is not repeated here. The parties reserve their rights to cite additional supporting evidence based on arguments raised during claim construction briefing.

| U.S. Patent No. 7,418,731 | | |
|---------------------------|-------------------------------|---------------------------------|
| | Finjan's Proposed | PAN's Proposed |
| Claim Term | Construction | Construction |
| "file cache" | "a memory for holding a file, | "data structure to temporarily |
| | at least temporarily" | store files" ² |
| (claims 1, 3, 14, 17) | | |
| | | PAN alternatively proposes |
| | | the following compromise |
| | | construction: |
| | | |
| | | "software or hardware to |
| | | temporarily store files for |
| | | faster retrieval later" |
| "incoming files from the | No construction necessary; | "files requested by an intranet |
| internet" | plain and ordinary meaning | computer from the Internet" |
| | | |
| (claims 1-3) | | |

| U.S. Patent No. 7,647,633 | | |
|---------------------------|---------------------------------|---------------------------------|
| Finjan's Proposed | | PAN's Proposed |
| Claim Term | Construction | Construction |
| "mobile protection code" | "code that, at runtime, | "code that, at runtime, |
| (claim 14) | monitors or intercepts actually | monitors or intercepts actually |
| | or potentially malicious code | or potentially malicious code |
| | operations without modifying | operations without modifying |
| | the executable code" | the executable code, where |
| | | the mobile protection code |
| | | itself must be executable" |

Court's Order (Dkt. 141), the parties are identifying only "ten claim terms in the joint claim construction statement" (Dkt. 141 at 2).

² The terms "security profile cache" and "security policy cache" are also disputed. PAN believes that these terms should be construed with "file cache" as a single term, which is the reason PAN's original construction included "security profiles" and "security policies." In the original JCCS, Finjan proposed the same definition of "cache" yet argues that the terms should be addressed separately.

| U.S. Patent No. 7,647,633 | | |
|-----------------------------|---------------------------------|---------------------------------|
| | Finjan's Proposed | PAN's Proposed |
| Claim Term | Construction | Construction |
| "downloadable-information | "a device or process that is | "user device that includes one |
| destination" | capable of receiving and | or more devices or processes |
| | initiating or otherwise hosting | that are capable of receiving |
| (claim 14) | a mobile code execution" | and initiating or otherwise |
| | | hosting a mobile code |
| | | execution" |
| "A computer program | The typographical error in the | Indefinite for claiming mixed |
| product, comprising a | preamble is corrected to read: | statutory classes and/or a lack |
| computer usable medium | | of antecedent basis |
| having a computer readable | "A computer program | |
| program code therein, the | product, comprising a | |
| computer readable program | computer usable medium | |
| code adapted to be executed | having a computer readable | |
| for computer security, the | program code therein, the | |
| method comprising" | computer readable program | |
| | code adapted to be executed | |
| (claim 14) | for computer security, | |
| | comprising:" | |

|-----------------------------|---|-------------------------------|
| | Finjan's Proposed | PAN's Proposed |
| Claim Term | Construction | Construction |
| "programming language" | No construction necessary; plain and ordinary meaning | Indefinite |
| (claims 1, 3-8, 22) | | |
| "lexical constructs for the | No construction necessary; | "elements forming the |
| specific programming | plain and ordinary meaning | specific programming |
| language" | | language's syntax and |
| | | defining the operation of the |
| (claims 1, 3-8, 22) | | program code" |
| | | |

U.S. Patent No. 8,141,154

Finjan's Proposed

Construction

No construction necessary;

plain and ordinary meaning

No construction necessary;

plain and ordinary meaning.

To the extent the Court construes this term, Finjan proposes: "a processor that

processes content"

PAN's Proposed

Construction

"a processor on the protected

"data or information, which

has been modified and is received over a network"

client/user computer that processes modified content"

III. PATENT L.R. 4-3(C): IDENTIFICATION OF TEN TERMS, THE CONSTRUCTION OF WHICH WILL BE MOST SIGNIFICANT TO RESOLUTION OF THE CASE

Finjan's Statement:

Claim Term

"content processor"

(claims 1, 2, 6, 7)

(claims 1, 2, 4, 6, 7, 10)

"content"

The parties each identified their top five most significant terms to be construed. As part of that process, the parties agreed on one term:

| U.S. Patent No. 7,647,633 | | |
|-----------------------------|--------------------------------|-------------------------------|
| Finjan's Proposed | | PAN's Proposed |
| Claim Term | Construction | Construction |
| "A computer program | The typographical error in the | Indefinite for claiming mixed |
| product, comprising a | preamble is corrected to read: | statutory classes and/or lack |
| computer usable medium | | of antecedent basis |
| having a computer readable | "A computer program | |
| program code therein, the | product, comprising a | |
| computer readable program | computer usable medium | |
| code adapted to be executed | having a computer readable | |
| for computer security, the | program code therein, the | |
| method comprising" | computer readable program | |
| | code adapted to be executed | |
| (claim 14) | for computer security, | |
| | comprising:" | |

In addition, Finjan identified four additional terms and PAN identified five additional terms, bringing the total disputed terms to be construed to ten, which are included in the table above in

Section II.

Finjan does not believe that construction of any of the disputed terms will be case or claim dispositive.

PAN's Statement:

PAN believes that the following terms are dispositive for non-infringement for their respective patents if PAN's proposed constructions are adopted:

- "content"
- "content processor"
- "parse tree"
- "lexical constructs for the specific programming language"
- "downloadable-information destination"
- "file cache"
- "mobile protection code"

If PAN's position regarding indefiniteness is adopted for the following terms, these terms are dispositive of invalidity for their respective patents:

- "programming language"
- "A computer program product, comprising a computer usable medium having a computer readable program code therein, the computer readable program code adapted to be executed for computer security, the method comprising"

IV. PATENT L.R. 4-3(d): TIME FOR CLAIM CONSTRUCTION HEARING

The parties anticipate that they will not require more than (3) hours for the entire claim construction hearing.

V. PATENT L.R. 4-3(e): WITNESSES AT CLAIM CONSTRUCTION HEARING

The parties do not believe that live expert testimony is required at the *Markman* hearing. However, the parties each expect to offer expert declarations in support of their proposed claim construction positions.

1 VI. PATENT L.R. 4-3(f): REQUESTED FACTUAL FINDINGS 2 No party requests any factual findings from the Court related to claim construction other 3 than those submitted with any expert declaration that may be served by the parties in accordance 4 with Pat.
